

Statutory auditor's limited assurance report on the consolidated sustainability information of Tessenderlo Group NV

To the general meeting

In the context of the legal limited assurance engagement on the consolidated sustainability information of Tessenderlo Group NV ("the Company") and its subsidiaries (jointly "the Group"), we provide you with our report on this engagement.

We were appointed by the general meeting of May 13, 2025, in accordance with the proposal of the board of directors as presented by the workers' council of the Company to perform a limited assurance engagement on the consolidated sustainability information of the Group included in the Sustainability Report section of the Annual Report as of December 31, 2025 and for the year ended on this date (the "sustainability information").

Our mandate will expire on the date of the general meeting deliberating on the annual accounts for the year ended December 31, 2027. We have performed our assurance engagement on the sustainability information of the Group for two consecutive financial years.

Limited assurance conclusion

We have performed a limited assurance engagement on the sustainability information of the Group.

Based on the procedures performed and assurance evidence obtained, nothing has come to our attention to cause us to believe that the sustainability information of the Group is, in all material respects:

- not prepared in accordance with the requirements of articles 3:32/2 of the Companies' and Associations' Code, including compliance with the applicable European standards for sustainability information (European Sustainability Reporting Standards (ESRS));
- not in compliance with the process carried out by the Group to identify the sustainability information ("the Process") in accordance with the European Standards as disclosed in subsection ESRS 2 General Information of the part of the annual report regarding environmental aspects in accordance with ESRS 2/IRO-1; and
- not in compliance with article 8 of EU Regulation 2020/852 (the "Taxonomy Regulation") regarding the publication of the disclosure included in *subsection EU Taxonomy* of the part of the annual report regarding environmental aspects.

Basis for conclusion

We conducted our limited assurance engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), *Assurance Engagements Other Than Audits or Reviews of Historical Financial*

Information, issued by the International Auditing and Assurance Standards Board (IAASB), as adopted in Belgium.

Our responsibilities under this standard are further described in the "Responsibilities of the statutory auditor for the limited assurance engagement on the sustainability information" section of our report.

We have complied with the ethical requirements that are relevant to our assurance engagement on the sustainability information in Belgium, including the independence requirements.

Our firm applies International Standard on Quality Management (ISQM) 1. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have obtained from the board of directors and the Company's officials the explanations and information necessary for our limited assurance engagement.

We believe that the assurance evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Board of directors' responsibilities for the preparation of the sustainability information

The board of directors of the Company is responsible for designing and implementing the Process and for disclosing this Process in note "ESRS 2 General information – Double materiality" of the sustainability information. This responsibility includes:

- understanding the context in which the Group's activities and business relationships take place and developing an understanding of its affected stakeholders;
- identifying the actual and potential impacts (both negative and positive) related to sustainability matters, as well as risks and opportunities that affect, or could reasonably be expected to affect, the Group's financial position, financial performance, cash flows, access to finance or cost of capital over the short-, medium-, or long-term;
- assessing the materiality of the identified impacts, risks and opportunities related to sustainability matters by selecting and applying appropriate thresholds; and
- making assumptions and estimates that are reasonable in the circumstances.

The board of directors of the Company is further responsible for the preparation of the sustainability information, which includes the information determined by the Process:

- in accordance with the requirements of articles 3:32/2 of the Companies' and Associations' Code, including compliance with the applicable ESRS;

- in compliance with the requirements of Article 8 of the Taxonomy Regulation regarding the publication of the information included in subsection EU Taxonomy of the part of the annual report regarding environmental aspects.

This responsibility entails:

- designing, implementing and maintaining such internal controls that the board of directors determines are necessary to enable the preparation of the sustainability information such that it is free from material misstatement, whether due to fraud or error; and
- selecting and applying appropriate sustainability reporting methods and making assumptions and estimates that are reasonable in the circumstances.

Those charged with governance are responsible for overseeing the Company's sustainability information.

Inherent limitations in preparing the sustainability information

In reporting forward-looking information in accordance with ESRS, the board of directors of the Company is required to prepare the forward-looking information on the basis of disclosed assumptions about events that may occur in the future and possible future actions by the Group. The actual outcome is likely to be different since anticipated events frequently do not occur as expected and the deviations may be material.

Responsibilities of the statutory auditor for the limited assurance engagement on the sustainability information

It is our responsibility to plan and perform the assurance engagement to obtain limited assurance about whether the sustainability information is free from material misstatement, whether due to fraud or error, and to issue a limited assurance report that includes our conclusion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence decisions of users taken on the basis of the sustainability information as a whole.

As part of a limited assurance engagement in accordance with ISAE 3000 (Revised), as adopted in Belgium, we exercise professional judgment and maintain professional skepticism throughout the engagement. The work carried out in an engagement with a view to obtaining a limited degree of assurance, for which we refer to the section "Summary of the work performed", are less in extent than for a reasonable assurance engagement. We therefore do not express a reasonable assurance conclusion.

As the forward-looking information contained in the sustainability information and the assumptions on which it is based, relate to the future, it may be affected by events that may occur and/or by possible actions of the Group. The actual outcome is likely to differ from the assumptions, as the anticipated events will frequently not occur as expected and the deviations may be material. Our conclusion is therefore not a guarantee that the actual outcomes reported will be consistent with those included in the forward-looking information included in the sustainability information.

Our responsibilities in relation to the Process for reporting the sustainability information, include:

- obtaining an understanding of the Process but not for the purpose of providing a conclusion on the effectiveness of the Process, including the outcome of the Process; and
- designing and performing procedures to evaluate whether the Process is consistent with the Group's description of its Process, as disclosed in note "ESRS 2 General information – Double materiality".

Our other responsibilities in respect of the sustainability information include:

- obtaining an understanding of the Group's control environment, relevant processes and information systems to the preparation of the sustainability information but not evaluating the design of particular control activities, obtaining evidence about their implementation or testing their operating effectiveness;
- identifying areas in the sustainability information where material misstatements are likely to arise, whether due to fraud or error; and
- designing and performing procedures focused on disclosures in the sustainability information where material misstatements are likely to arise. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Summary of the work performed

A limited assurance engagement involves performing procedures to obtain assurance evidence about the sustainability information. The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

The nature, timing and extent of our procedures depend on our professional judgment, including the identification of disclosures where material misstatements are likely to arise, whether due to fraud or error, in the sustainability information.

In conducting our limited assurance engagement, with respect to the Process, we have:

- obtained an understanding of the Process by:
 - performing inquiries to understand the sources of the information used by management (e.g., stakeholder engagement, business plans and strategy documents); and
 - reviewing the Group's internal documentation of its Process; and

- evaluated whether the assurance evidence obtained from our procedures about the Process implemented by the Group was consistent with the description of the Process set out in note "ESRS 2 General information – Double materiality".

In conducting our limited assurance engagement with respect to the sustainability information, we have amongst others:

- obtained an understanding of the Group's reporting processes relevant to the preparation of its sustainability information by obtaining an understanding of the Group's control environment, relevant processes and information systems to the preparation of the sustainability information but not evaluating the design of particular control activities, obtaining evidence about their implementation or testing their operating effectiveness;
- evaluated whether material information identified by the Process is included in the sustainability information;
- evaluated whether the structure and the presentation of the sustainability information is in accordance with the ESRS;
- performed inquiries of relevant personnel and analytical procedures on selected disclosures in the sustainability information;
- performed substantive assurance procedures based on a sample basis on selected disclosures in the sustainability information;
- obtained assurance evidence on the methods for developing material estimates and forward-looking information as further described in the "Responsibilities of the Statutory auditor for the limited assurance engagement on the sustainability information" section of our report; and
- obtained an understanding of the process to identify taxonomy-eligible and taxonomy-aligned economic activities and the corresponding disclosures in the sustainability information.
